How To Transfer Photos From Your Phone

Step One: After plugging in your smart phone to the **USB** port located on the front of your computer console click on the yellow folders found on the bottom left of your screen

Step Two: Under the label computer click on the tab with the name of your

phone.

Step Three: You will then see a folder named **Phone**, after you tap on that you will see lots of folders. Find the one named **DCIM**

5.80 MB

Step Four: There you will see folders named the same as the albums in your photo gallery. Find the one(s) you are looking for and double click.

Step Five: Select the photos you want ...

... then drag them to a specified folder or to pictures.

Your all done! Good Job :)
