Entrepreneurship (Replaces Marketing 2-3)
Entrepreneurship focuses on recognizing a business opportunity, starting a business, operating and maintaining a business. Students will be exposed to the development of critical thinking, problem-solving, and innovation in this course. Integration of accounting, finance, marketing, business management, legal and economic environments will be developed throughout projects in this course.

Foundations of Business & Marketing (Replaces Marketing 1)
Students learn the fundamental business concepts that any successful business person needs. The class combines practical project-based learning, classroom practice, and business simulation, to give students the skills and knowledge necessary for business success in today's world.

Social Media Marketing (Replaces Marketing 1)
In this class, students will learn how social media works, the ethics and laws around social media, the value of a positive on line presence and have the opportunity to create and analyze their own social media campaign. Students will examine and refine their writing and communication skills by researching various texts and case studies and applying specific communication techniques.

Business Operations (Replaces Marketing 2-3)
Business Operations/School-Store provides students an opportunity to run a successful School-Based Enterprise, as well as develop the skills and attitudes required for any job. Students learn and practice ces, pricing, market research, and merchandising techniques.

Foundations of Manufacturing (CHS- 3 Periods)
In Foundations of Manufacturing, students will learn air plain structures while working with Boeing professionals to design airplane concepts. Additionally, students will learn and apply drilling, countersinking, and riveting in class and at Boeing during the SkillsUSA Assemblers Competition!

Cyber Security (JHS Only -AP CSP Pre-Requisite)
Cyber Security introduces students to the techniques needed to protect computer systems and networks from the theft of or damage to hardware, software, or electronic data, as well as from the disruption or misdirection of the services they provide. This is one the highest demand and fastest growing fields.

Computer Program through Graphics & Animation 1 & 2
This course replaces Exploring Computer Science as our computer science intro course. The class is designed to appeal to a wide diversity of students by including animation, art, graphics, with computer programming.

Nutrition & Wellness (New Course)
In Nutrition & Wellness students will learn how to identify each body's individual nutrient and caloric needs to maintain a healthy lifestyle. Students will also learn how to use the most common kitchen items safely!

Fundamentals of Patient Care (EHS Only- 3 Periods)
Students will experience patient and medical roles to gain strong communication, technical, interpersonal and medical skills for patient care, resulting in a certification opportunity for nursing assistant.

Health Science Careers & Medical Terminology (Replaces Medical Terminology)
This course is designed for students who are interested in becoming proficient in medical language as well as for students entering health occupations such as medical assistants, medical transcriptionists, receptionists, administrative support, and billing specialists.
