

Sea Turtle

Padre Island National Seashore, Texas

Did You Know?

Sea turtles are one of the most iconic and popular animals found at Padre Island National Seashore.

No Maps: Sea turtles can detect the Earth's magnetic field and they use it as a compass.

Shell Life: Since they don't have to protect themselves from predators for most of their life on water, sea turtles cannot retract their flippers and head into their shells.

Life Span: Sea turtles can live upwards of 100 years.
