

# SECOND GRADE STARS

Friends & Ms. Toneri

## Literacy

Woohoo, we are starting our informational reports about animals we are curious about. Students will research their animals, take notes while researching, write a rough draft, engage in editing with me and word process their final copy so it is ready to share with their classmates. This will be our culminating activity to unit 2 in the Reach curriculum which has the big question, "What does it take to survive?"

## Science

We have started learning about how to be scientists and the process scientists use to solve problems.

We are reading about Mariana and her aunt who is a scientist. They walk us through the process of discovering why their ohelo plant is growing.

November 8, 2024

## Mathematics

Our unit 3 in mathematics is a favorite of mine, many hands-on activities, all about measurement, please read attached newsletter for more information:

# TAKE FLIGHT!

## Important Dates Coming Up

Thank you parents for all coming to your child's conference. I thoroughly enjoyed learning more about your child. Contact me anytime with questions, concerns or if I can support you with helping your child.

November 11th: Veterans Day (no school)

Thank you to all veterans for serving our country.

November 27th-29th-Thanksgiving Break - No School

If anyone would like to send in on the 26th, little juices, cookies, individual chips or plates or napkins for that day, we welcome your contribution. We are only granted one party a year, Valentines Day, but enjoy celebrating the special moments too.

## Questions to Ask Your Child...

Which is a bigger unit of measurement, inches or centimeters? How do you know?" Kayden

Why do animals need special adaptations to survive in the wild?" Kenna

"What is a way we can honor people who have served in the Armed Forces?" Emma
