

# SECOND GRADE STARS

Friends & Ms. Toneri

October 14th, 2021

## Conferences

Please check your email to find a live link where you will be able to sign-up for a conference time of your choice. I am happy to conference with you via zoom or in-person. If you need to find "live" links sent in newsletters, they can be found electronically on either my website or canvas page>announcements>newsletters.

## Butterflies and Literacy

Wow, our butterflies are getting fat and full, they eat and eat and eat! Next week, we will further extend our knowledge about the life cycle of butterflies as we enjoy not only observing their growth but also engaging in reading, informational writing and painting about our friends for which we  are caretakers.

## Conversation Starters with Your Student

What is the most interesting fact you've learned about butterflies?

Show me with paper and pencil how to solve  $17 + \underline{\quad} = 48$ ? Hint: Draw a # line or picture.

Can you make up a "silly saying"? Words are FUN!!! Check the back for our silly sayings!

## Mathematics

Next week we continue our study of "Adding and Subtracting within 100" using place value! This unit will include story problems that involve one and two-steps with unknowns in different positions. Students will also use number lines and base-ten cubes in addition to place value charts to solve problems.

## Important Dates Coming Up

October 29th: PTA Pumpkin Party

Please note changed date, 6:30-8:30 p.m.

Conferences: November 1st-4th
