

Name _____

Count the Students

The numbers of students in several school districts are shown in the table.

District	Number of Students
District A	three thousand, four hundred fifty
District B	three thousand, four hundred thirty-five
District C	thirty-four hundred fifty
District D	three thousand, four hundred forty-five
District E	three thousand, four hundred
District F	three thousand, four hundred twenty-five

Write the number of students in each district in standard form. Then use $<$, $>$, or $=$ to compare the number of students in the two districts.

1. Number of students:

District E: _____

District B: _____

2. Compare: District E _____ District B

3. Number of students:

District C: _____

District A: _____

4. Compare: District C _____ District A

5. Number of students:

District D: _____

District F: _____

6. Compare: District D _____ District F

7. Draw a number line beginning at 3,400 and ending at 3,450. Count by 5s. Label each district's population on the number line where it belongs.
