

March Math Mission Possible

Birthday Money

2nd and 3rd Grades

Mackenzie and Matthew wanted to buy their mother a box of candy for her birthday. They emptied their piggy banks and discovered that Mackenzie had twice as much in her bank as Matthew had in his. Together they had a total of \$10.50.

How much did each child contribute to the total?

Hint: Make a table like this to keep track of your guesses.

Matthew's \$	Mackenzie's \$	Total
