

Henry M. Jackson High School's FIRST Robotics Team Jack In The Bot Team 2910 is competing at two District events this Competition season.

PNW MT. Vernon March 17 – 19 and PNW Glacier Peak (@ Glacier Peak High School) March 25-26.

This year the robots are competing on the field to score fuel for 'air ships', deliver gears to the 'airship' which will allow the human pilots to engage the airships rotors and then during the last 15 seconds of play the robot climbs a rope onto the airship!

Our team Jack In The Bot is proceeding Full Steam Ahead! We made it to the semifinals of competition play and finished the district event with an event ranking of 8 out of 28 teams. We also won an award for Creativity because during autonomous play our shooter can be reconfigured to take advantage of the symmetry of the field of play.

We encourage you to come out and watch our team compete at Glacier Peak High School on March 25 or March 26 from 11:30 to 4:30, it is an exciting competition, you can see a video of our game matches here.
