

Good morning, today is Monday, April 23rd

We will have a GIVE club today at lunch, see you there!

Attention eighth graders! Have you turned in your UW Seattle field trip form to Mrs. Gitnes yet? Completed field trip forms are due to Mrs. Gitnes in the front office by Friday, April 27th. Students who turn their UW field trip forms are more likely to get their first choice for departmental tours. Please get your UW forms in as soon as possible to secure your spot on the field trip to UW Seattle.

Do you love science experiments? Are you interested in creating tools to solve problems. Do you enjoy researching answers to science or math questions? If so, the Innovation Expo STEM Competition is a great opportunity for you!

Students can compete in one of three categories: experiment, research, or engineering design.

Proposals for projects are due to your science teacher by April 25th and completed projects are due by May 18th. Please ask your science teacher for an information packet. Selected projects from each class will be invited to enter the districtwide Innovation Expo STEM Competition at Angel of the Winds Arena in Everett on June 6.

Thank you Gateway, remember to guard your character.
