

March 19, 2022: JHS Robotics Team 2910 headed to their second 2022 “Rapid React” season event at the SunDome in Yakima this weekend. Despite some mechanical challenges, the drive team and robot “Thor” performed confidently, clinching the qualifying rounds with a 12-0 record and entering eliminations as the captain of the number 1 alliance. Along with partners, Team 2930: The Sonic Squirrels (Glacier Peak High School), and rookie team 8532: Classified (Umatilla High School), Team 2910 powered through to the finals to bring home another winner’s blue banner. We are grateful to our sponsors and our families for their support, and to our excellent alliance partners at the event. The team will take the field again at the Bonney Lake High School district event April 2-3, hoping to clinch a spot at the PNW District Championships later in April.

Team members Aron Seagal, William Harris, Drew Middleton, and drive coach, Patrick Woolfenden, work on “Thor” in the pits in between matches.

Team 2910 “Thor” climbs the hangar alongside alliance partner Team 2930’s robot, earning the alliance extra points at the end of the match.

Drive team (L-R) William Harris, Drew Middleton, Eric Gibson, Patrick Woolfenden (drive coach), and Darlina Phan with the team’s winners banner and trophies at the end of the competition.

Team 2910 logs a second season “W” at the 2022 PNW District SunDome event in Yakima, WA.
