

Technology Students Association (TSA) is a well-established club at Henry M. Jackson High School. It is a club that prepares students for bright futures through science, technology, engineering, and mathematics. During the annual state competition that took place between 3/22/2023 and 3/25/2023, 50 students from JHS competed with other High School students across the state in various competitions such as Webmaster (Creating a Website), Video on Demand (creating a video while at the conference and editing it), Biotechnology Design, Engineering Design, Children's Stories, and much more. Students work individually or in teams to compete in their chosen interest. Those who place during state, advance to a national competition to compete with students from all across the nation.
