

# Make Inferences

Reteach

You **make inferences** every day. You figure out why something happens using

- what you know, what you see, and what you read.

Look at the boy. He looks happy. You can make an **inference** that he likes his skateboard.

## The Giraffe

What do giraffes eat? They like green leaves best. A giraffe will walk far to find a tree with leaves. It must eat a lot of leaves to get full!

Sometimes the leaves are at the top of the tree. The giraffe stands tall. It stretches its neck. The leaves are good.

**Follow the directions.**

1. What does the picture tell about giraffes?

\_\_\_\_\_

2. Circle words that tell what giraffes eat.

3. Why does the giraffe stretch its long neck?

\_\_\_\_\_

4. Retell what you read.
