

# Counting Collections

Name \_\_\_\_\_

I counted pennies

I had 67 items in my collection

This is how I counted my collection.

00 00 0 5	00 00 0 10	00 00 0 15	00 00 0 20	00 00 0 25	00 00 0 30	00 00 0 35
--------------------	---------------------	---------------------	---------------------	---------------------	---------------------	---------------------

00 00 0 40	00 00 0 45	00 00 0 50	00 00 0 55	00 00 0 60	00 00 0 65	00 00 0 67
---------------------	---------------------	---------------------	---------------------	---------------------	---------------------	---------------------

$$5+5+5+5+5+5+5+5+5+5+5+5+5+2 = \boxed{67}$$

How many more to get to 100?  
(show your thinking!)

$$67 + \boxed{33} = 100$$

$$67 + 3 = 70$$

↓

00 0 70	00 00 0 75	00 00 0 80	00 00 0 85	00 00 0 90	00 00 0 95	00 00 0 100
---------------	---------------------	---------------------	---------------------	---------------------	---------------------	----------------------

I added 33!
