Instructions: Using 2 dice: Roll 2 identical dice, one in each hand. The die in the left hand will coordinate with the vertical column and the die in the right hand with the horizontal row. Find the picture or word that coordinates with each die, say the word or use it in a phrase or sentence. Cover the square with a bingo chip or a paint dotter. The first person to get “bingo” wins. For more practice: Play “Blackout!” where the goal is to cover every square on the page. Other options for using two dice: use two different colored dice, dice that are two different sizes or have the adult roll one die while the student rolls the other. Another option using one die is to choose one row or one column and roll the die to complete each row or column.
