

# Our commitment to clean energy

Scott Harder: Customer Outreach

TOGETHER, we're creating a better energy future.

# Local, clean energy solutions for nearly 150 years.

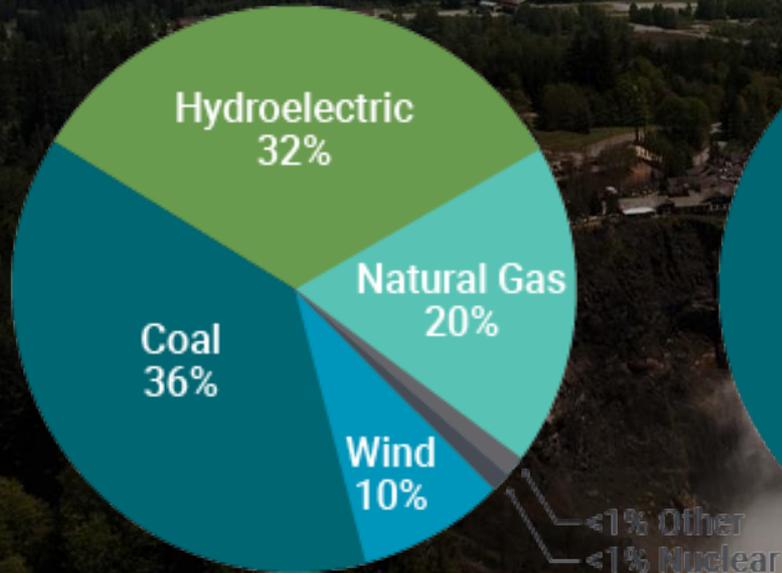

- Washington's largest utility, serving 1.5 million customers
- Headquartered in Bellevue, with service area covering 6,000 square miles
- Our 3,100+ employees live and work in the communities we serve
- We share our communities value of protecting the environment

# Local, clean energy solutions for nearly 150 years.

- **Clean hydroelectricity:** Snoqualmie Falls and Baker River
- Largest utility producer of **renewable energy** in the Pacific NW
- Built one of the region's largest **solar power arrays**
- Groundbreaking **customer renewable energy programs**
- Together with our customers, saved **67 billion** electric kWh and **600 million** natural gas therms through energy efficiency

# We're investing in forest carbon offset projects to reduce emissions and preserve local environments.

- Trees naturally absorb greenhouse gases as they grow
- PSE is encouraging the use of environmentally sustainable forest management practices, so trees are proactively managed to grow larger and reach their maximum carbon capture potential
- Healthy forests provide a variety of local environmental benefits: ecosystems, watersheds, air quality, habitats

We're setting an example of environmental stewardship for other Pacific Northwest forest owners and companies

PSE is investing in forest carbon offsets in two ways:

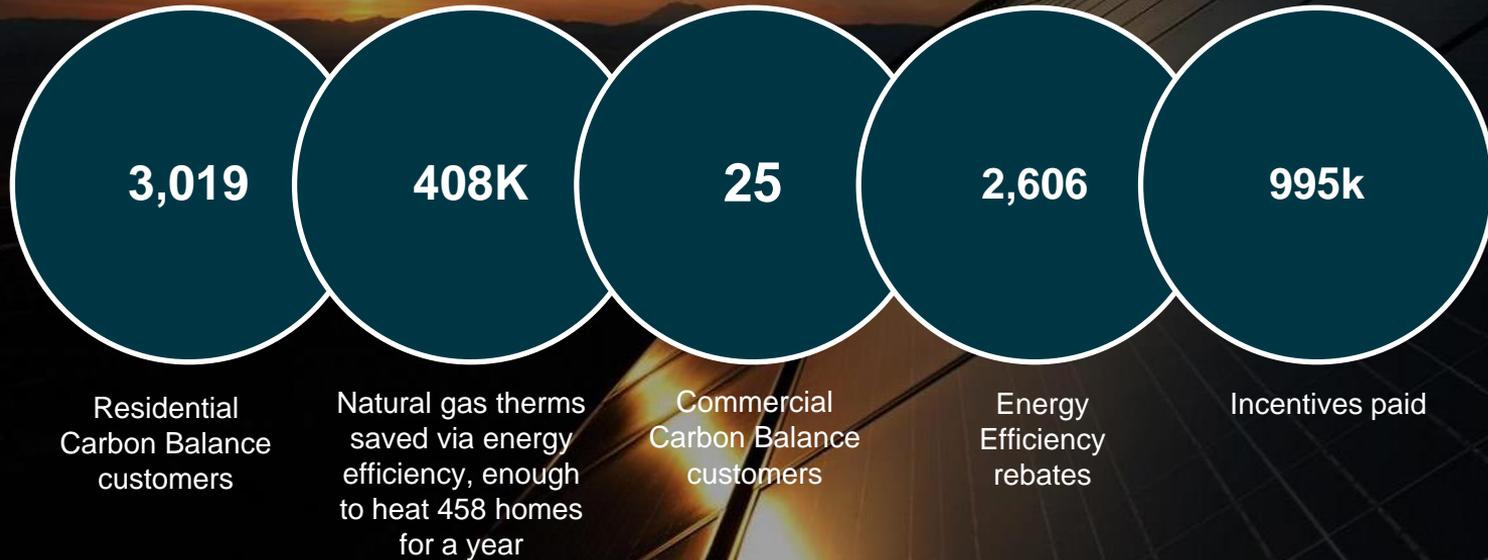

Collaborating on forest carbon projects with local landowners

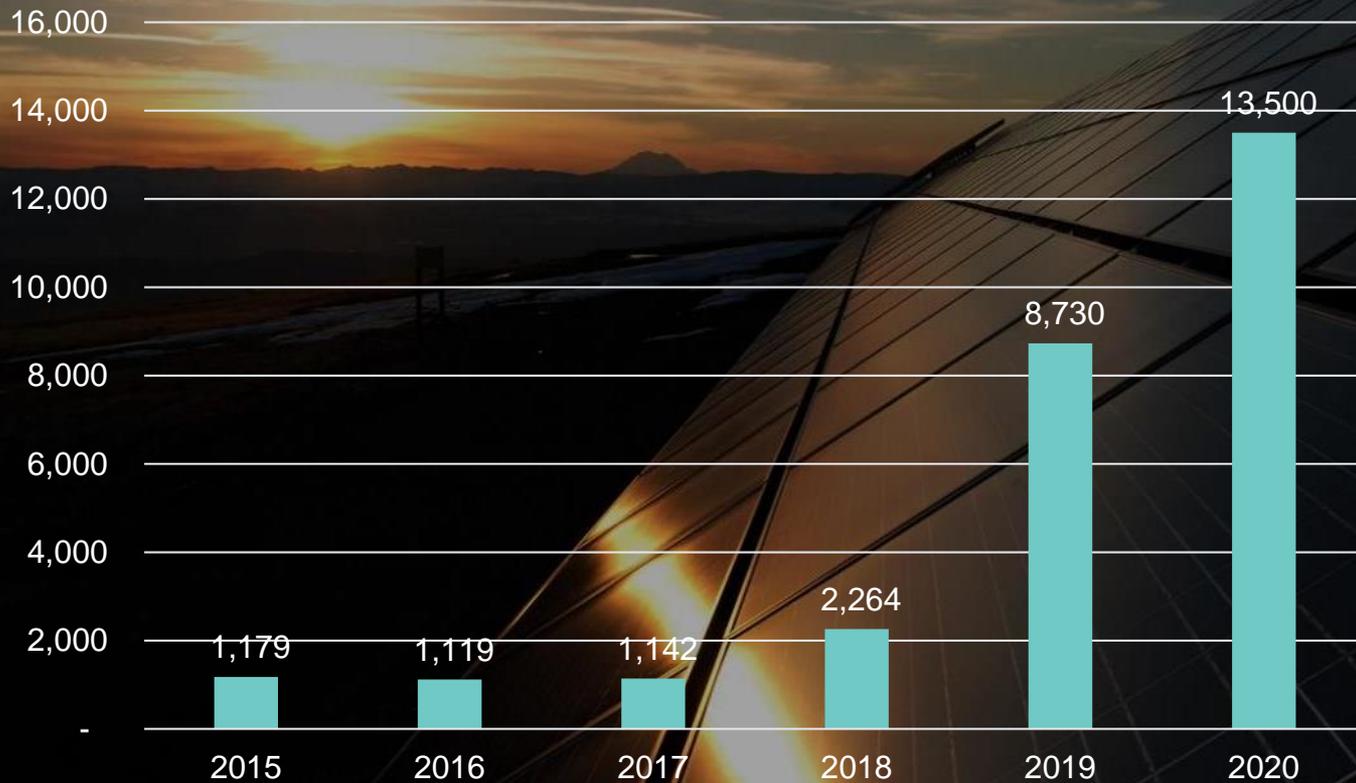

Committing to preserve PSE-owned forest land

# Clean energy achievements in Snohomish County.

*Information based on 2020 data.*

## Carbon Balance Participants (all)

Information based on 2018 data.

TOGETHER, we're creating a better energy future. 9

# Today's mission: Deep decarbonization and greenhouse gas emissions reduction.

Partnering on **forest offset** and **carbon capture** projects with landowners

**Net-zero methane emissions by 2022** on our local distribution system through renewable natural gas, energy efficiency, leak detection and repair

**Addressing transportation emissions**—largest source in WA (43%)—through investments in **electric vehicles** and **LNG**

We will be **coal-free by 2025**, years ahead of schedule

# TOGETHER, we're creating a better energy future.
