**Attachments:** Science Engagement Overview Mar 23 - Apr 3.pdf; Math Activities March 23.pdf; ELA engagement activities March 23-April 3\_.pdf

Dear FVE 5<sup>th</sup> grade families,

We hope you are doing well, and all your loved ones are staying healthy. We are missing seeing the kids each day. Now that many of you have become familiar with the resources posted last week from the District and our 5<sup>th</sup> grade team, we are ready to move on to our theme for the next 2 weeks: **Engage and Connect!**

We encourage you to **connect** with us and continue to send us photos of how you are keeping yourself busy during this time. This helps all of us feel connected to our classroom community. Starting this week, there will be three locations where you can get copies of our learning **Engagement** activities:

- 1) Attached to our weekly email
- 2) On our FVE teacher websites ([Mrs. Nichol teacher site](#))
- 3) Google Classroom ([EPS Google Apps](#) )

The math and science engagement activities are for you and your family to use as it fits into your schedules. These activities are meant to take you up to Spring Break. Please feel free to pick and choose from the menu. Also, please let us know which activities you liked best so we can continue to provide fun and engaging activities during this time. If you feel like you need more, please do not hesitate to reach out to your teacher.

For ELA, please make sure you have joined our Epic classroom ([Website](#) class code: tag9397). Let me know if you need me to re-email the 24-hour-free access code. Also, please continue to take those AR quizzes and iReady lessons, we look forward to seeing your progress! We are looking forward to reading your small moment stories as well and will have set up a google assignment soon. Don't forget you have a CIA set-up in your notebook; we posted a link to a review video about the CIA format on our teacher websites.

If kids are missing specialists, look for links to their weekly suggested engagement activities on their websites or linked from our teacher websites.

Tech: [Michele Hoyer](#)

Many families are asking about the math crunch time, the answer key is uploaded on the teacher website (left hand menu).

We would like to offer an optional regular check-in through Google Classroom. Mrs. Nichol's will be Monday and Thursday from 10-11 am. During this time, students can log on to ask me questions or just say hello.

We miss you all and hope you all stay safe, sane, and healthy. 😊

All our best,

Mrs. Ally Nichol, Ms. Heather Knouse, Mrs. Hailey Riehl, and Mrs. Teresa Reynolds
